

AVAILABLE IN

Classic (Single)	(#39215)
Classic (4 Pack)	(#39214)
Sliver (Single)	(#39212)
Sliver (4 Pack)	(#39213)

FEATURES*

- Proprietary GIAPlex dual-action technology, designed to neutralize the effects of electropollution exposure, as well as reinforce your body's natural resilience to it.
- Effective on Cell Phones, Smart Phones, Bluetooth & PDAs
- Convenient and affordable
- No maintenance required

CELL GUARD™

FOR MOBILE PHONES, SMART PHONES & BLUETOOTH DEVICES

Electromagnetic radiation (EMR) emitted by cell phones, PDA's, Bluetooth headsets, etc. has been linked to various stress-induced health issues. We subject ourselves to this overbearing external stressor every day. The GIA Cell Guard allows you to use your cell phone, smart phone, Bluetooth or PDA with the peace of mind you deserve. Utilizing the proprietary GIAPlex technology, the GIA Cell Guard actively works to neutralize the effects of your exposure to harmful radiation, while supporting the body's resilience to stress at the same time.*

POWERED BY
giaplex™

GIAPlex™ combines the benefits of GIA's patented noise field technology, and proprietary subtle energy technology. Powering much of TerraGIA's line of "Inspired Energy" products, GIAPlex™ has been designed as an effective way to deal with the cumulative stress associated with living in today's hectic, electronic, and wireless environment.*

*"For the last 10 years I have used a Cell Phone between 30 and 60 hours per week for business. During the last several years I've noticed an increase in tension in my neck and shoulder area. I also suffered with a nagging discomfort in my right ear whenever I used my phone. Once I discovered the GIA Cell Guard those problems disappeared."**

J.W., Dana Point, CA

terragia™

CELL GUARD™

FOR MOBILE PHONES, SMART PHONES & BLUETOOTH DEVICES

*"When I was introduced to the GIA Cell Guard, I was skeptical regarding its validity. However, after putting the Cell Guard on my Cell Phone, I no longer get a hot ear after continued Cell Phone use and I feel less stressed!"**

J.L., San Diego, CA

*"For months, I had felt a drilling discomfort in my shoulder that neither chiropractic nor massage could ease. After just a few days of having the GIA Cell Guard on my Cell Phone I woke up one morning to discover my discomfort was gone! Completely gone! Over the next several days I noticed that I was bouncing out of bed quicker and had more energy all day long, more than I had for quite some time. Many people commented on how energetic I was. My thanks to the entire GIA Wellness team for bringing such a wonderful product and opportunity into my life!"**

P.C., New York, NY

FREQUENTLY ASKED QUESTIONS*

Q. Do I need to do anything to the cell phone before I apply the GIA Cell Guard?

A. For best adhesion, make sure the phone's surface is clean. Apply the GIA Cell Guard to a dry, flat surface.

Q. Can I move my Cell Guard from one cell phone to another cell phone?

A. GIA does NOT recommend moving a Cell Guard from one phone to another - unless the new phone is the exact same make and model of the original phone. Different phones emit and receive different frequency ranges, therefore the Cell Guard should not be transferred.

Q. What is the lifespan if my GIA Cell Guard?

A. The polymer inside the Cell Guard has a lifespan of three years, therefore you should replace your Cell Guard every three years. This polymer is only half of the driving force behind the GIAplex technology and should not be confused with ERT (Energy Resonance Technology), which does not expire.

Q. Will the Cell Guard affect the signal strength of my phone?

A. The GIA Cell Guard has been designed to neutralize the effects of your exposure to EMR, while leaving the signal strength of your cell phone unaffected.

Q. Is the GIA Cell Guard water and heat resistant?

A. Yes, the Cell Guard is water and heat resistant. Although, it's safe to say if you submerge it in water or set it on fire, it's likely you'll need to replace it.

Q. What's the difference between the GIA Cell Guard and the GIA Universal Guard™?

A. There are a few key differences between the two. The amount of patented polymer used in the Universal Guard is different than in the Cell Guard, as it is designed to be used on larger electronic devices. Their individual shape and packaging are different as well.

Q. If I use the GIA Hands-Free Airtube Headset™, do I still need to put a Cell Guard on my phone?

A. Yes, we still recommend you use the GIA Cell Guard on your Cell Phone. The best way to address EMR emitted from your Cell Phone while experiencing hands-free convenience is to use the GIA Cell Guard and the GIA Hands-Free Headset together.
