

Just as the Earth has an electro-magnetic field, so do each of us.

Would you like to feel more grounded, calm & balanced to experience positive flow in your life ... easily?

If you are feeling out of sorts, stressed or fatigued for no particular reason, what about stagnant energy in and around your body, at home & work ... Good chances if you have wireless devices or live/work near traffic, power lines or wifi areas. Man-made emf frequencies contribute to accumulated radiation exposure in the human body, causing increased stress, de-hydration, premature aging & pain issues.

(frequencies of wifi & distorted trees are pictured at the left)

There are cell phone & wifi harmonizers, and copper environmental devices that help clear negative energies, allowing more favorable

flow, clarity and balance in our bodies and our surroundings.

Things we can do now:

some simple techniques to encourage clean energy in our bodies:

- ... go bare foot on the ground or beach sand...[Earthing / grounding](#)
- ... move electronics away from sleeping areas, turn off when not using, especially at night and when sleeping, recuperating & relaxing.
- ... do activities that give you a sense of joy, peace & nourishment.

Ask about cell phone guards, a Light-Life Ring for your home's power meter and the GeoBuster for property & surrounding areas.

~ Protect, strengthen & renew your personal energy field ~
reported benefits – more clarity, energy, joy & vitality, electronics & appliances lasting longer, healthier animals, thriving plants, sleeping better ...
