 Metabolism Boost  
 Pain Relief  
 Peace / Stress Support  
 Protection / neutralizing negativity  
 PMS  
 Willpower

These wrist bands are made with a concentrated, earth squishy formula containing blends of ground-up rocks & crystals, therapeutic gemstones, flower essences and essential oils. VibesUP has created 19 different themes that reflect published and known benefits to be helpful in this specific area.

Since the veins in our wrists are so close to the surface of our skin, these remedies can be absorbed through the skin and carried very efficiently via the veins to every cell of the body every 60 seconds. This is referred to as a sublingual whole-body delivery method, much like taking a remedy under the tongue. This is a very efficient, effective & natural way of absorbing these healing essences.

A famous Japanese scientist Dr. Masaru Emoto shocked the world with his actual photos of how powerfully 'energy' instantly effected liquids! (We are over 70% water/liquid). As the wrap embraces the wrist, its natural vibrational energy is now in close contact with the liquid of our veins. Imagine what an impression all those nature vibrations are having. Our blood can help deliver remedies to every cell of our bodies every 60 seconds, Imagine how powerful this wrist wrap can be! Some people nickname the wrist bands as - 'Nature's IV drip' - without the needle.

Built in Batteries - The band has tiny natural quartz crystal batteries. In their compressed state they produce over 1 million rays of natural energy per second (piezo energy). They never run out of natural energy! When energy rays are infrared whatever they pass through they can pick up the information (nature ingredients) and gently deliver it to whatever it touches next (us!) Imagine Nature's wisdom and balance delivered deep into our whole body ... an easy way to regain natural grounding benefits.

This is a bracelet-like wrist band - with velcro around to fit most wrist sizes, or around a cup or bottle.

If you have stiff, sore or a painful neck, arms, hands, elbows, knees, legs, ankles, or anywhere ...
