

**Lightbulbs – a choice** ... if you consider personal health effects, our environment, long-term accumulated exposure, sustainability & related costs. Our choices now, make a difference that can benefit us (or not) and our world for a long time.

We have found the LED – Light Emitting Diodes light bulbs easy to change to. They have no mercury or lead, and last for 10 to 20 years. Now available at home improvement centers, department stores & hardware stores.

For a significant upgrade with your lighting that also cleans the air, check out Pure-Light Technology ... [www.pure-light.com](http://www.pure-light.com) This technology significantly reduces bacteria, virus and odors, besides providing light. Please call or email us with any questions.

An incandescent light bulb produces light by heating a filament wire to a high temperature until it glows.

A CFL contains a mixture of argon and mercury gases that produces invisible ultraviolet light (UV) when the gas is excited by electricity.

An LED contains electrons that recombine with electron holes, releasing energy in the form of photons and illuminating the bulb.

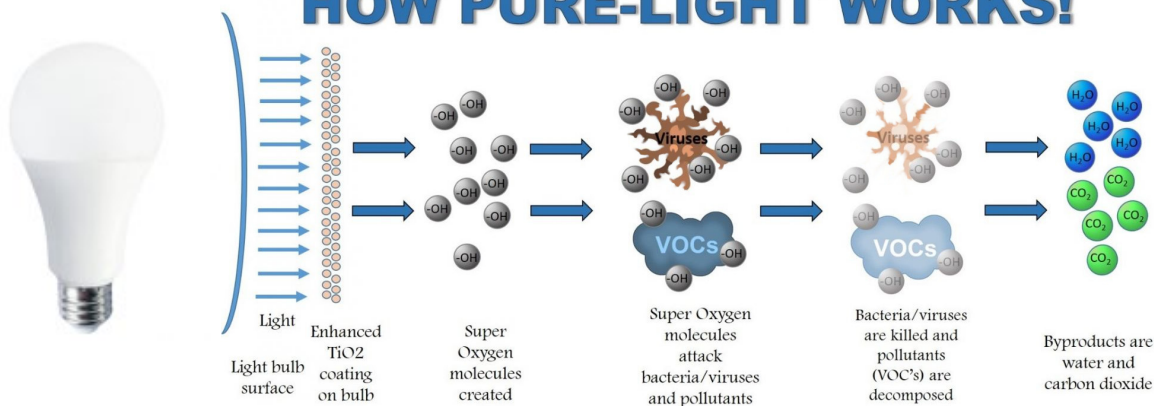

~ Clean, Fresh, Safe ~

### Revolutionary Super-Oxygen Light Technology

Every year there are seasonal cold, flu and disease outbreaks. Besides the ever present problems with Toxic Mold, E-Coli, Salmonella, MRSA, and other dangerous and harmful pathogens. Because of the way that the Pure-Light Super-Oxygen Technology works, these negative super oxygen molecules are attracted to pathogens and dissolves them. This unique proprietary formula of naturally occurring Titanium-dioxide is a naturally occurring process that nature has been using for millions of years outdoors and in our own bodies. Pure-Light has harnessed this and made it affordable to help protect our families and the planet from the harmful contaminants in the world.

**and the savings** ... uses 70%-90% less energy compared to incandescent bulbs  
 50% less energy compared to fluorescent lights... and no mercury!  
 Lasts 10-20 times longer than incandescent and fluorescent bulbs!
